

**Innovative Medical Products® LapWrap™ Positioning Pad
Ideal for CT, MRI, EMS and Military Medical Applications**

Easy-to-use positioning pad not only secures patients' arms in laparoscopic surgery but also during medical imaging procedures or emergency transport

PLAINVILLE, Conn., May 7, 2009 – [Innovative Medical Products®](#), an industry leader in patient positioning devices for orthopedic surgical procedures, offers the [LapWrap™](#) Positioning Pad to secure patients' arms by their sides during surgery, medical imaging procedures or emergency transport. The easy-to-use, soft-foam pad is ideal for CT, MRI, EMS and military medical applications, as well as for laparoscopic and head/neck orthopedic surgery. Besides securing patients' arms, the [LapWrap™](#) can be used to organize and provide access to IV tubes and leads for anesthesia-

As one OB-GYN surgeon, who successfully tried the [LapWrap™](#) pad, remarked, "I wondered when someone would make a product so easy to use as the [LapWrap™](#). I have put it on my needs card for all my laparoscopic cases where arms need to be tucked."

The latex-free positioning pad is manufactured for single use and is universally sized to accommodate any patient. In addition, the innovative device protects the neurological structures of the elbow and acts as a warming blanket for the patient. Used with hook and loop fasteners, the [LapWrap™](#) is simply configured for quick, easy securing of a patient's arms and can be trimmed with scissors for better viewing of wire leads, tubing or connections.

About Innovative Medical Products Established in 1983, [Innovative Medical Products®](#) is focused on developing innovative products to benefit and improve efficiency in the operating room and hospital clinics where patient stability and positioning are required. Its products are designed to provide accuracy for the surgeon, save time for operating room personnel, and benefit the overall patient surgical experience.
